

Sure — here are **simple, clear, Class 12–level answers** that you can directly use in your assignment.

1. Pick any two apps you use daily (like Instagram, Zomato, or Flipkart) and identify one online marketing technique each app uses to attract new users. Write a short explanation (2-3 lines) for each technique.

App	Online Marketing Technique	Short Explanation
Instagram	Influencer Marketing	Instagram works with influencers and content creators to promote the platform and its features. Influencers help attract new users because people often trust and follow their recommendations.
Zomato	Discount & Promotional Offers	Zomato uses online discounts, coupons, and special offers to attract new customers. Attractive offers encourage people to download the app and place their first order.

**2 . Create a simple digital flyer (image or PDF) for a new food delivery app launch, highlighting at least three online marketing concepts such as referral codes, limited-time offers, or influencer shoutouts.

Hint: Use Canva or any free online design tool to make your flyer look engaging.**

Here is ready-to-use content for a flyer. You can recreate it easily in **Canva**:

 **FOODIEGO**

Your Favourite Food, Delivered Fast!

 **GRAND LAUNCH OFFER** 

 **50% OFF** on your first order
Limited-time offer — Hurry!

REFER & EARN

Invite your friends and get **₹100 OFF** on your next order.

★ INFLUENCER SPECIAL

“Recommended by your favourite food creators!”

 **Download FOODIEGO Today**

Order • Eat • Enjoy

Use Code: FIRST50

Offer valid for a limited time. Terms & conditions apply.

Design idea: Use a bright food-themed background, large pictures of burgers/pizza, a bold “50% OFF” badge, and a smartphone showing the FoodieGo app.

3 .List five types of online ads you’ve seen while using YouTube, Instagram, or any other app. For each, mention which platform you saw it on and what made it noticeable or skippable.

Type of Advertisement	Platform	What Made It Noticeable or Skippable?
1. Video Advertisement	YouTube	Attractive visuals and a catchy opening made it noticeable, but a long advertisement made it easy to skip.
2. Sponsored Reel	Instagram	A short, entertaining video made it noticeable and looked similar to normal content.
3. Story Advertisement	Instagram	Bright images and a clear discount attracted attention, while a boring message could make users skip it.
4. Search Advertisement	Google	It appeared at the top when searching for a product, making it useful and noticeable.
5. Display Advertisement	Websites/Apps	Colourful images and special offers attracted attention, but repetitive ads could be ignored.

4. Imagine you are launching a new playlist feature for a music app like Spotify. Write a short plan (5-6 lines) describing how you would use online marketing concepts (SEO, social media posts, email campaigns, influencer partnerships) to promote this feature.

1. I would use **SEO** to create content around keywords such as “best playlists,” “personalized music playlists,” and “new music playlists.”
2. I would create attractive **Instagram Reels, YouTube Shorts, and social media posts** demonstrating the new feature.
3. I would send **personalized email campaigns** recommending the new playlist feature to existing users.
4. I would collaborate with **musicians, DJs, and music influencers** to create and share playlists using the new feature.
5. I would use **in-app notifications** to inform users about the new feature and encourage them to try it.
6. Finally, I would track clicks, playlist creations, shares, and user engagement to measure the campaign's success.
