

1.

List 5 digital marketing activities you think Zomato or Swiggy uses to attract new users, and briefly explain how each one helps the app grow.

ANS 5 Digital Marketing Activities Used by Zomato or Swiggy

Digital Marketing Activity	How it Helps the App Grow
1. Social Media Marketing	Zomato and Swiggy use Instagram, Facebook, and X to post creative food content, memes, offers, and trending posts. This increases brand awareness and attracts new users.
2. Influencer Marketing	They collaborate with food bloggers, influencers, and creators who recommend restaurants and offers. This builds trust and encourages followers to download and try the app.
3. Discount & Promotional Campaigns	Offers such as first-order discounts, free delivery, coupons, and special festival deals attract new customers by making their first purchase more affordable.
4. Search Engine & Online Advertising	They use Google Ads and other online advertisements to appear when people search for food delivery, restaurants, or food offers. This helps reach users who are already interested in ordering food.
5. Push Notifications & Personalized Offers	The apps send notifications about discounts, nearby restaurants, new launches, and personalized recommendations. These reminders encourage users to open the app and place orders, improving customer engagement and retention.

2.

Create a simple chart or table comparing any 3 digital marketing channels (like Instagram ads, YouTube influencer marketing, and Google search ads) for a new mobile app launch — include their main advantage and one possible drawback for each

ANS

Digital Marketing Channel	Main Advantage	Possible Drawback
Instagram Ads	Excellent for reaching young users through attractive images, Reels, and Stories.	Competition is high, so ads can become expensive.

YouTube Influencer Marketing	Influencers can demonstrate the app and build trust with their audience.	Choosing the wrong influencer may result in low engagement or wasted money.
Google Search Ads	Reaches people who are already searching for apps or solutions related to your product.	Popular keywords can have a high cost per click.

3.

Pick any app you use daily (such as Flipkart, Myntra, or Paytm) and write a short plan (5-6 lines) describing how you would promote a new feature using digital marketing methods.

ANS Digital Marketing Plan for a New Feature

App: Flipkart — New Feature: AI Shopping Assistant

1. I would announce the new AI Shopping Assistant through **Instagram, Facebook, and YouTube** using short demo videos.
2. I would collaborate with **technology and lifestyle influencers** to show how the feature makes shopping easier.
3. I would send **personalized push notifications and emails** to existing Flipkart users about the new feature.
4. I would offer a **limited-time discount or special reward** to users who try the feature for the first time.
5. I would use **Google Ads** to reach people searching for smart shopping or AI shopping tools.
6. Finally, I would track downloads, feature usage, clicks, and conversions to improve the campaign.

4.

Imagine you are launching a new music playlist feature for a Spotify-like app. Write a 5-step digital marketing plan to create buzz and get users to try it.
 it.

Hint: Think about using social media, influencer partnerships, email campaigns, or in-app notifications.

ANS Step Digital Marketing Plan for a New Music Playlist Feature

Step 1: Create Social Media Buzz

Launch teaser posts and short Reels on Instagram, YouTube Shorts, and other social platforms showing that a new playlist experience is coming.

Step 2: Partner with Influencers

Work with popular musicians, DJs, and music influencers. Ask them to create and share their own playlists using the new feature.

Step 3: Run a User Challenge

Create a campaign such as **“Create Your Vibe”**, encouraging users to make and share their personalized playlists. Offer prizes or premium access to increase participation.

Step 4: Use Email & In-App Notifications

Send personalized emails and push notifications telling users about the feature. For example: **“Your new playlist is ready—discover your next favorite songs!”**

Step 5: Measure & Improve

Track playlist creations, feature usage, shares, clicks, and new users. Use this data to identify what works best and continue promoting the feature through the most successful channels.
