

Below are **simple, assignment-ready answers** to all 5 questions.

1. Simple Blog Homepage — HTML Only

The anchor text is descriptive and keyword-relevant rather than using generic terms such as “click here” or “read more.”

```
<!DOCTYPE html>
<html>
<head>
  <title>Business & Technology Blog</title>
</head>
<body>

  <h1>Business & Technology Blog</h1>

  <p>Explore our latest articles about business, technology, and digital marketing.</p>

  <h2>Latest Articles</h2>

  <ul>
    <li>
      <a href="/business-growth-strategies">
        Effective Business Growth Strategies for Small Companies
      </a>
    </li>

    <li>
      <a href="/seo-internal-linking-guide">
        Complete Guide to SEO Internal Linking
      </a>
    </li>

    <li>
      <a href="/digital-marketing-trends">
        Latest Digital Marketing Trends for Businesses
      </a>
    </li>
  </ul>

</body>
```

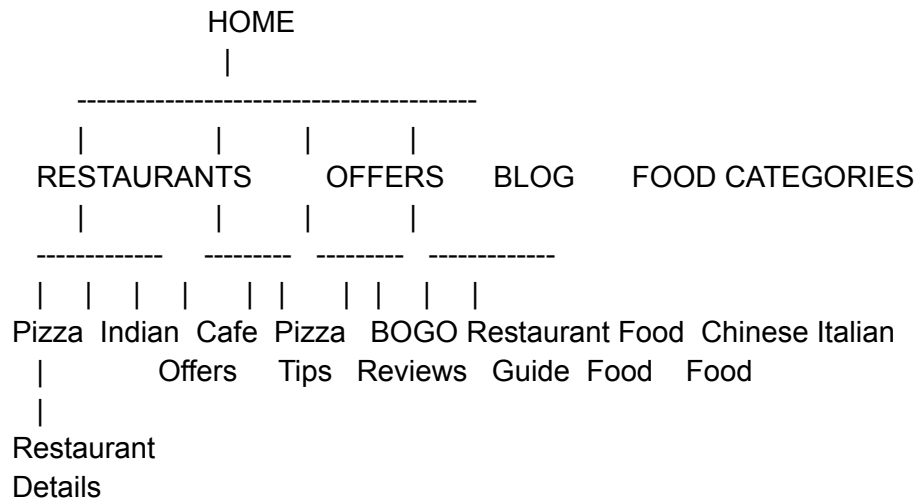

</html>

Why this is good for SEO:

The anchor text clearly tells both users and search engines what the destination page is about.

2. Silo Structure Diagram for a Food Delivery Website

A food delivery website such as Zomato can organize its pages into clear SEO silos.

Recommended Internal Linking

Home → Main Categories

- Home → Restaurants
- Home → Offers
- Home → Blog
- Home → Food Categories

Restaurants → Subpages

- Restaurants → Pizza Restaurants
- Restaurants → Indian Restaurants
- Restaurants → Cafes
- Individual restaurant pages → Related restaurants

Offers → Subpages

- Offers → Pizza Offers
- Offers → Buy One Get One Offers
- Offers → Restaurant Discounts

Blog → Subpages

- Blog → Restaurant Reviews
- Blog → Food Guides
- Blog → Food Trends

SEO Benefit

This structure creates a clear hierarchy:

Home → Category → Subcategory → Individual Page

It helps search engines understand which pages are related and allows internal link authority to flow between relevant pages.

3. Optimized Anchor Text for Flipkart-Style Product Page

Original Anchor Text	SEO-Friendly Anchor Text
See more	Explore more smartphones
Click here for reviews	Read smartphone customer reviews
Go to similar products	Compare similar smartphones
Read about returns	View the easy return policy

Why these are better

The new anchor texts describe the destination page clearly and include relevant keywords naturally.

For example:

“Click here for reviews” ❌

“Read smartphone customer reviews” ✅

The second version gives users and search engines more context about the linked page.

4. BookMyShow-Style Website — Which Pages Should Get Most Link Juice?

Suppose the website has these 6 pages:

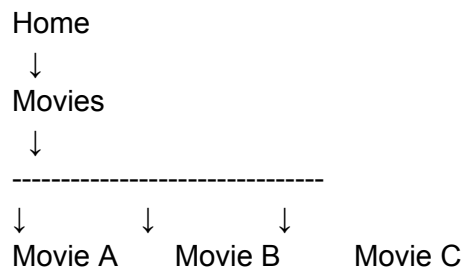

1. Home
2. Movies
3. Movie Details
4. Upcoming Movies
5. Theatres
6. Offers

Two pages that should receive the most link juice:

1. Movies

The **Movies** page is an important category/hub page because it can connect users to many individual movie pages.

Example:

2. Movie Details

Individual movie pages are highly valuable because users search for specific movie information such as:

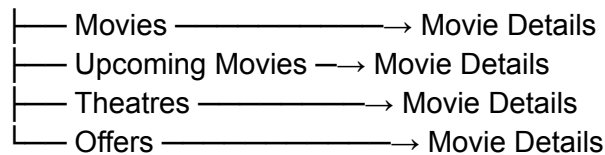

- Movie name

- Showtimes
- Cast
- Reviews
- Trailers
- Ticket booking

Internal Linking Strategy

I would increase links to these pages from important locations:

Home

Use descriptive anchors such as:

- **Latest Movies**
- **Upcoming Movies**
- **Movie Showtimes**
- **Movie Reviews and Details**

This distributes internal authority toward important commercial and informational pages.

5. Music Streaming App — Pillar & Cluster Model

Topic Cluster: Music Discovery and Playlists

Pillar Page

Pillar Page:

Ultimate Guide to Music Discovery and Playlists

This broad page covers the overall topic and links to more specific articles.

Cluster Pages

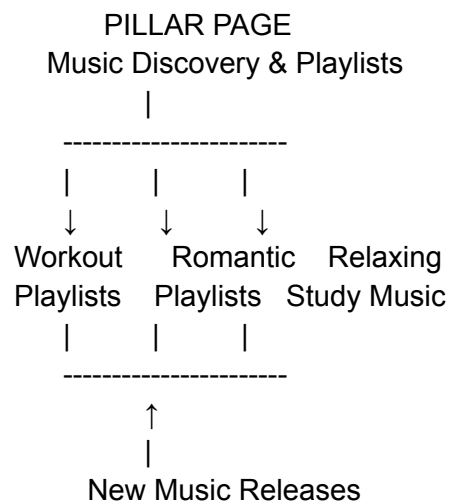

Cluster 1:
Best Workout Songs and Playlists

Cluster 2:
Best Romantic Songs and Playlists

Cluster 3:
Best Relaxing Songs for Studying

Cluster 4:
Best New Music Releases

Pillar-Cluster Structure

How to Internally Link Them

The **pillar page** should link to every cluster page using descriptive anchor text:

- Best workout songs and playlists
- Romantic songs and playlists
- Relaxing music for studying
- Latest new music releases

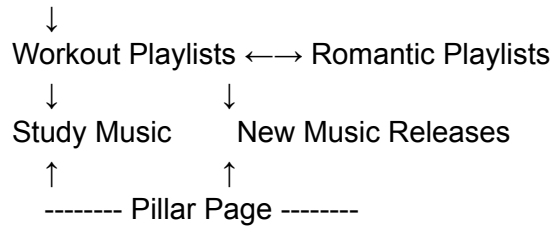

Each cluster page should also link back to the pillar page.

For example:

Best Workout Songs and Playlists → **Ultimate Guide to Music Discovery and Playlists**

The cluster pages can also link to other closely related cluster pages.

Pillar Page

SEO Benefit

The **pillar-cluster model** helps search engines understand the relationship between pages. The pillar page targets the broad topic, while cluster pages target more specific search queries. Internal links connect the entire topic together and help distribute authority throughout the cluster.

Overall SEO Rule

For all these examples, use **descriptive, natural anchor text** rather than generic anchors such as:

- ✗ Click here
- ✗ See more
- ✗ Read more
- ✗ Go here

Prefer:

- ✓ Best smartphone reviews
- ✓ Latest upcoming movies
- ✓ Indian restaurant offers
- ✓ Music playlists for studying

This makes the website **easier to navigate and clearer for search engines to understand**.
